## **ASSOCIATION OF OUTDOOR LIGHTING PROFESSIONALS RELEASES NEW GUIDELINES FOR LOW VOLTAGE LANDSCAPE LIGHTING**

**HARRISBURG, PA** – The AOLP Board of Directors is pleased to announce the release of a new document produced by AOLP, ***Guidelines for Low Voltage Landscape Lighting***.

This document was produced by AOLP members with the intent to establish industry guidelines in an area where none currently exist to provide guidance to contractors and designers in the trade as well as related professions, such as landscape designers, landscape architects, etc.

The Guidelines are available to both members of the lighting trade as well as the general public. It is AOLP's goal to constantly update the Guidelines to be current and in the best interest of the trade practice.

**[To download the Guidelines click here.](#)**

Who should know about these guidelines? Landscape architects, landscape designers, landscape contractors and anyone else in the outdoor lighting industry would benefit from knowing about and utilizing these Guidelines.

*For more information about AOLP, visit our website at [www.aolponline.org](http://www.aolponline.org). The Association of Outdoor Lighting Professionals is a national organization representing the interests of lighting professionals. The mission of the organization is to establish standards, educate industry professionals and increase awareness of the outdoor lighting industry.*
